PROFESSIONAL SUMMARY

Full-stack MERN dev who enjoys building fast, user focused apps. I've worked with remote teams across the US, UK, and Saudi Arabia, usually owning frontend development from scratch. I care about clean code, smooth UI, and solving problems without unnecessary complexity.

PROFESSIONAL EXPERIENCE

Full Stack Web Developer | *Moallim United Co., Ltd.* / Remote Jul 2024 – May 2026

- Improved site loading speed by 40% through performance tuning.
- Built internal tools using React, Node, and MySQL, reducing manual work and improving operations.
- Built a shipment-management CRM system with dashboards and CRUD features.
- Integrated REST APIs for seamless data flow.
- Played an important role in the full frontend rebuild of MCM.sa.

MERN Stack Developer | *JFR Autoparts* / Remote Nov 2023 – Jul 2024

- Built and optimized internal tools using React, Node.js, and MySQL to improve inventory and order systems.
- Developed CRM modules including scrapers and automated stock refill features.
- Built internal web tools using React, Node.js, and MySQL to improve inventory and order management.
- Developed a warehouse CRM with automation tools including scrapers and auto stock refill systems.

Junior Web Developer | *Roch Dog* / Remote Feb 2023 – Nov 2023

- Debugged and optimized JavaScript and API integration issues
- Collaborated with team to deliver updates to web app.
- Assisted in creating dynamic web UIs for ecommerce clients.

TECHNICAL SKILLS

- Frontend: React.js, Next.js, Redux, Tailwind, CSS
- Backend: Node.js, Express.js, REST API, FastAPI
- Databases: MongoDB, MySQL
- Other: Git, Shopify (Liquid), Socket.io, API Integration

EDUCATION

High School | **Usman Public School System** Feb 2026

KEY ACHIEVEMENTS

- Led the entire frontend development for MCM.sa, building the full interface and optimizing from scratch.
- Improved site loading time by 40% across major web apps through performance tuning and smarter design decisions.
- Built a complete shipment management CRM system (MERN) used daily by operations teams to streamline tracking and workflows.
- Delivered complex features under tight timelines while coordinating with remote teams across the US, UK, and Saudi Arabia.
- Took ownership of projects end-to-end from planning, development, testing to deployment.
- Reduced manual operations work by 30% through internal tools.
